WE ARE FALCOON

The world is changing. Are you striving for a better life, on the search for new and innovative ways to get more out of your money? Conventional investment products today offer hardly any worthwhile advantages. That is why it's time for something that will truly provide you with long-term support and help.

That is precisely why Falcoon was founded. Make use of the experience of the world's best traders and get more out of your money with two unique, innovative products.

Falcoon deals with the Forex market and the trade of cryptocurrencies. We are achieving impressive results in this sector that you can benefit from.

ABOUT FALCOON

Falcoon is distributed exclusively by **Prince De Heidendorf** – Asset Management.

Falcoon provides a specially developed software that enables you to manage and invest your capital independently.

GOAL

We want to give our customers an innovative, sustainable way to get more out of their money.

VISION

With Falcoon, we will make a positive change in people's lives and see to it that you can more easily achieve your goals and dreams.

VALUES

Our focuses are the long term, integrity, and professionalism, with product benefits that make this system so unique.

FOREX MARKET

The exchange market is the most liquid and robust market in the world. In fact, there is no other market with a comparably huge trade volume. According to estimates, the volume of the foreign exchange trade (also referred to as the currency trade) is approx. 4 billion USD per day. This number easily exceeds the volume of the total global stock trade.

Until just a few years ago, only institutional investors had access to this market. Falcoon now makes it possible for you to profit from it as well.

When you invest in commodities and they fall in value, it will always have a negative effect on your capital. Now you can also invest in the Forex market, have the goods lose value, and nevertheless achieve high profits.

The trade is based on the buying and selling of currencies. In this process, the depreciation and appreciation of a currency is determined by means of technical analysis, and the capital is introduced to the market in small parts.

In our case, traders with several years of success take this on together with your team. You do not have to trade in your money yourself.

FOREX TRADING PRODUCT

Forex Trading is a product by **Falcoon** in which you can essentially invest any amount. **However, the minimum investment is 500.00 EUR.**

You have full access to your capital and the generated profits every four weeks. Two cycles start each month, every four weeks. (1st of the month to the 31st of the month, as well as the 15th of the month to the 14th of the following month) The generated profits are announced on the 31st and 14th of each month (1-3% per month).

In the case of initial investment, or an increase in the amount to be invested, a management fee in the amount of 1.5% of the invested amount will be charged.

To allow your money to participate in the cycle, you only need to invest it prior to the start of the cycle. You have the option of skimming the profits each month while still having the original capital be invested further. There is also the option of withdrawing parts of the return, as well as parts of the capital, at the end of the cycle.

The total in Pools 5-8 refers to the capital through your downline.

Exemplary representation - Qualification

Definitions

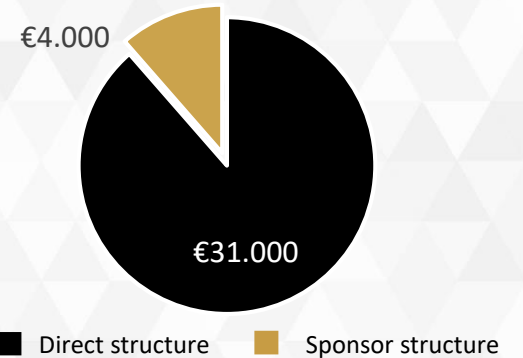

- **Direct structure:** all partners who were sponsored by you (1.Gen)
- **Sponsor structure:** all partners who were sponsored by your direct partners and their partners (from 2.Gen)
- **Downline depot:** the total volume of direct structure plus sponsor structure

Too qualify for the 3rd pool you need:

- **Own investment of 5.000€**
- **Downline Depot of 35.000€**
- **At least 3 direct partners**

You need three direct partners who have invested at least € 500 into Forex. Let's say one of your direct partners has now invested € 30,000. That means you have already reached 30,000 € of the required 35,000 €. Their two other partners have invested € 500 each, so a further € 1,000 will be added. This means that 31.000 € (direct structure) have now been reached. Now your direct partners have also sponsored people. These users therefore belong to your sponsorship structure. The sum that these users have invested in Forex is € 16,000. 25% of this money now belongs to your Downline depot. That means in this case 4,000 € are added (sponsor structure). So you would have reached the required downline depot and would have been qualified for pool 3..

required: 35.000€

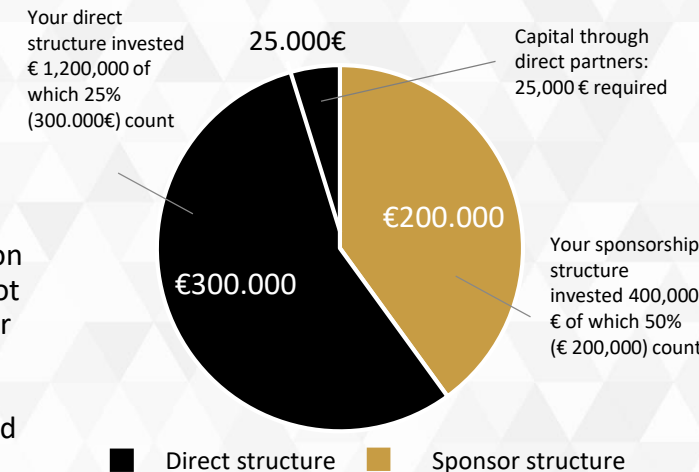

Too qualify for the 5th pool you need :

- **Own investment 20.000€**
- **At least 6 direct partners**
- **Downline depot of 500.000€**
- **5% of the downline deposit must come through direct partners**

From pool 5 the criteria change a bit. From then on, only 25% of the contribution of your direct partners will count, but 50% of the contribution of the sponsor structure. At least 5% of the downline deposit must come from direct partners. To qualify for pool 5, you need a downline depot of € 500,000. In addition, you need 6 direct partners who have invested at least 500 € in Forex. Assume the sum of the capital invested by your direct partners is € 1,200,000 (thus the € 25,000 is achieved by direct partners). This includes 300,000 € (direct structure) to your Downline depot. So there is still 200,000 € missing. The total amount that your sponsorship structure has invested in Forex is 400,000 €. 50% of your money will be added to your Downlinedepot. This means that in this case 200,000 € are added (sponsor structure). So you would have reached the required downline depot and would have been qualified for pool 5.

required: 500.000€

CRYPTOCURRENCIES

Cryptocurrencies are digital payment methods that are generated and managed by means of blockchain technology. As things stand today, these currencies are considered secure payment methods, depending on the currency.

Especially nowadays, cryptocurrencies are becoming more and more important for investors. You can already trade on the stock exchanges with many of these currencies today.

The market trend is taking on a gigantic scale. Take the bitcoin, for example. It has had a market trend of 1478.7% over the past five years.

CRYPTO MINING TRADE PRODUCT

Bitcoin	1%
ADV Cash	1%

All costs listed here, such as Autobuy, Fast Placement and Wings to User apply per Falcoon Wing.

Autobuy: As soon as the active Falcoon Wings have achieved sufficient returns for another Wing, the Autobuy function automatically purchases another Wing. The Autobuy fee is charged for each Wing purchased with Autobuy.

Fast Placement: Usually a Falcoon wing is activated after three working days. With Fast Placement the Wings are already activated on the same day. The Fast Placement fee is charged for each Wing for which this service is used.

Gift Wing to User: Spend Wing to User allows you to purchase Wings for other users. This service can be used in combination with Autobuy.
