

WELCOME TO

ALGO-
BOT.TRADE

Everybody is looking for a **chance** to **increase** their capital on a short or longterm basis.
Transparency and visual control are the key to success.

Mostly we don't have access to the necessary **knowledge** or experience.
In most of the cases we would simply need an unreachable amount of money.

Algo-Bot

is a semi automatic trading software, which has been developed and optimized over many years through the **knowledge** of **experienced** traders.
It is the goal to achieve a suitable return with a decent risk management.

These parameters promise a **long** and **stable growth** of your investment.

Your Advantages Summerized:

- ✓ Algo-Bot is free of charge
- ✓ Low initial capital (starting @ 25\$)
- ✓ No special knowledge required
- ✓ Your Investment: 100% Control, 100% Overview
- ✓ Daily Earnings
- ✓ Payouts/ Reinvest, weekly possible starting @ 10\$.

You are probably wondering how can something like this work and being free of any charges?

- ✓ Our team of experienced traders and developers only earn money if the investment also generates profits
- ✓ This is exactly your advantage since no membership fees or any other hidden costs and expenses being charged
- ✓ We therefore decided to choose profit sharing
- ✓ Additionally, you benefit from the extensive knowledge and experience of our experts working on maximum but realistic investment growth
- ✓ All our clients will receive daily information about the generated profits and returns, including a part of your investment and the other part represents the profit
- ✓ Each investment runs 1 year, means 365 days, means generating a return ~ 180% annually, which means ~ 80% net profit on your investment

Algo-Bot highly rewards loyalty and team development

Your capital which is invested runs for 1 year without return of the deposit, because the deposit is included proportionally in the daily return - The targets are as follows:

0,45% - 0,7% daily → 2,25% - 3,5% weekly → 9,74% - 15% monthly → 117% - 180% yearly

The following calculations are based on an average calculation model.

For example, average calculated returns :

approx. 0,57% daily // approx. 2,85% weekly // approx. 12,34% monthly // approx. 148,08% yearly

Investment examples:

USD 250,- → \$ 1,43 daily // \$ 7,12 weekly // \$ 30,85 monthly // \$ 370 yearly

USD 500,- → \$ 2,85 daily // \$ 14,25 weekly // \$ 61,7 monthly // \$ 740 yearly

USD 1.000,- → \$ 5,7 daily // \$ 28,5 weekly // \$ 123,4 monthly // \$ 1.481 yearly

USD 5.000,- → \$ 28,5 daily // \$ 142,5 weekly // \$ 617 monthly // \$ 7.404 yearly

USD 10.000,- → \$ 57 daily // \$ 285 weekly // \$ 1.234 monthly // \$ 14.809 yearly

USD 25.000,- → \$ 142,5 daily // \$ 712,5 weekly // \$ 3.085 monthly // \$ 37.022 yearly

Contribution of the investment WITHOUT reinvesting.
